

CAMBRIDGE MEDICAL GROUP

About Dr Lee Mun Heng

Dr Lee Mun Heng is driven by a passion for helping his patients look their best. With more than 10 years of medical aesthetics experience and a graduate of the world-renowned University of Cambridge in the United Kingdom, Dr Lee aims to draw out one's natural beauty through the application of safe, minimally invasive and holistic procedures.

A graduate of University of Cambridge, Dr Lee read medicine and surgery on a prestigious scholarship from the Cambridge Commonwealth Trust. He spent his clinical years at Addenbrooke's NHS Hospital in Cambridge before graduating with a Bachelor's in Medicine and Surgery in 2003. During which, Dr Lee also spent a year on research with the University's Department of Molecular Pathology and was consequently conferred a Master of Arts. Dr Lee was one of five Cambridge medical students in his cohort to secure an elective position at the famous Mayo Clinic in Minnesota, USA.

Upon his return to Singapore, Dr Lee joined Raffles Hospital as Manager of its Plastic Surgery and Aesthetic Centre and held a concurrent position as Manager of its Internal Medicine and Oncology Centre. While at Raffles Hospital, Dr Lee played an instrumental role in pioneering a programme to train

general practitioners who demonstrated potential for further development in the field of medical aesthetics. Dr Lee is a pioneer key opinion leader & trainer appointed by Galderma™ for Sculptra™ collagen-stimulating fillers. He has also trained with Dr Alfredo Hoyos in VASER™ liposuction, Dr Accardo in minimally invasive facelift techniques, CUTERA™ for advanced laser techniques, attended advanced training at FOTONA Laser's headquarters in Europe, and more. Dr Lee constantly travels to South Korea, Taiwan and around the globe seeking the latest treatments for his patients, ensuring that Cambridge's patients receive the latest treatments.

Dr Lee believes in integrative treatment for his patients and works closely with leading specialist doctors with strong track records in their respective fields. Recently, Dr Lee was under the tutelage of leading experts in Korea to bring to his patients ULTRA V LIFT, the revolutionary lunch-time facelift procedure that is gaining market traction throughout Asia.
